Data Visualization with Power BI and Tableau

Practical – VI

Roll No.: T038	Name: Akansha Pritam Ranade
Class: TYIT	Batch: 1
Date of Assignment: 21-08-2026	Date/Time of Submission: 21-08-2026

Designing Effective and Visually Appealing Dashboards

A: Apply Worksheet-Level and Workbook-Level Formatting

Drag order details file from files field

The screenshot shows the Tableau Desktop interface. On the left, the 'Connections' pane lists 'List of Orders' and 'Order Details' as text files. Below it, the 'Files' pane shows a list of files: 'List of ...ders.csv', 'Order Details.csv', and 'Sales target.csv'. A checkbox for 'Use Data Interpreter' is present. The main workspace displays a relationship diagram with two boxes: 'List of Orders.csv' and 'Order Details.csv', connected by a blue line. The 'Connection' type is set to 'Live'. At the bottom, the 'Columns' shelf shows a relationship between 'List of Orders.csv' and 'Order Details.csv' based on 'Order ID'. The 'Rows' shelf is empty, and the view is set to '100 rows'.

Connections

- List of Orders (Text file)
- Order Details (Text file)

Files

- ☐ Use Data Interpreter
Data Interpreter might be able to clean your Text file workbook.
- List of ...ders.csv
- Order Details.csv
- Sales target.csv
- New Union
- New Table Extension
